AutoCAD PC/Windows

Public API AutoCAD 2010 introduced an API, AutoCAD Application Programming Interface (AutoAPI), which is designed to allow designers to interact with AutoCAD from any programming language and applications. This is referred to as AutoAPI Connect. AutoAPI Connect supports all AutoCAD interface components. The AutoAPI is available in C, C++, C#, Python, VB, PHP, Java, and JavaScript. Additional AutoCAD functionality is provided by third-party tools and add-on products that can be used from the application. As of AutoCAD 2010, the C++ API is the only one available through the software application. The AutoAPI Connect components are accessible via a C++ API. The C++ API also provides for integration with third-party programs, both through toolbars and windows, and through components such as filters and configurable toolbars. In AutoCAD R2016 there was a limited interface for standalone Linux programs called AutoAPI Lite. On the API side, with the launch of AutoCAD 2013, the interface underwent a major change with the replacement of DXF file exchange and Office Open XML. The new file format used for the applications is called a drawing file (.dwg). The DXF file format was available for more than 20 years and still remains, with many legacy applications supporting the old format. However, with the introduction of the new format, in Autodesk's AutoCAD 2014, the new format was given the official name of "dwg" which is now used in Autodesk AutoCAD 2016 and later. The format is also the same for AutoCAD Architecture, AutoCAD Electrical, AutoCAD Mechanical, AutoCAD Civil 3D and.dwg is intended to be the new industry standard for exchange and publishing of CAD data. AutoCAD is a cross-platform application, available for Windows, macOS, Linux and Unix, allowing it to be used from a number of other platforms, including iOS, Android, and the web. AutoCAD is an industry standard, with more than 150 million users worldwide, including architects, engineers, draftsmen and designers. Reception AutoCAD is a highly regarded CAD package, with the greatest market share of CAD packages on the Windows platform in both use and revenue. PC Magazine stated that AutoCAD was the best-selling CAD package in 2007, 2008 and 2009. In 5b5f913d15
