The Spanish club was given a suspended ban on Thursday. Photograph: Marcos Mújica/AFP/Getty Images Spain's top referee on Thursday gave Valencia one of the hardest punishments in the history of Spanish football and charged the Spanish club and its players with a match-fixing conspiracy, after an extraordinary night of soccer in which Valencia was declared winners by 2-1 after a 2-2 draw with Athletic Bilbao. At the end of the dramatic night, the FIFA disciplinary committee imposed a suspended six-month ban on Valencia's stadium and its facilities and ordered the club to pay the costs of the investigation. The club will be fined €150,000 (£120,000) and its team, including the players, will be banned from all competitions for the next six months. The players, who will miss the Champions League final next month, will be fined €60,000 (£50,000) each. Valencia said it would appeal against the decision at FIFA's Appeals Committee, which will be held in London. It also has the right to appeal against the English Football Association, who declared that the game should have been deemed a draw. Valencia president Amadeo Salvo said: "I am totally disgusted by what has happened. I am a victim of false information and I consider this as a coup against democracy. "This decision will have serious consequences for our club, for the players and for me as the club's president. I will defend myself in the legal process and I will do everything to clear my name." The issue has rocked Spanish football since the beginning of the season, when the Spanish club sold the Premier League player Isaac Cuenca to a1d647c40b
