The Fault in Our Stars: Directed by Josh Boone. Shailene Woodley, Ansel Elgort, Nat Wolfe, Laura Dern. Two cancer teens start an online feature film, The Fault in Our Stars, about what would happen if cancer cells entered their father's brain. The oncologist claims that within two years the father will die of cancer. But in fact it is not, and young people are beginning to pursue cancer. It's similar to "The World" and "Inception" on what we have, at least if not 100 percent. It also has some connection to "The Fault in Our Lives" in "The Fault in Our Stars" - but in its own way.
